

Children's Miracle Network Hospitals raises funds which are used locally to help treat babies and children at Centra Virginia Baptist and Lynchburg General Hospitals.

Our major projects include:

- Building a child-friendly Pediatric Center and Emergency Department Pediatric Pod at Lynchburg General Hospital.
- Providing medical equipment for the Neonatal Intensive Care Unit, Pediatric Center, and Pediatric Pod.
- Giving a neonatal/pediatric ambulance to transport babies and children to the hospitals.
- Providing equipment to fly babies by helicopter.
- Creating the Center for Childbirth and Family Education at Virginia Baptist to reduce premature births and infant mortality.
- Establishing a state-of-the-art baby-friendly nursery.
- Treating babies born dependent upon opioids and their moms.

We can only do this with the support of individuals, organizations and businesses in the community.

Please donate or reach out to us with your fundraising ideas to help the kids!

Children's Miracle Network Hospitals is a program of the Centra Foundation.
